

FUEL TRUCK

ADVANTAGE

Marcotte Mining Machinery Services Inc. is the recognized leader for design strength and performance in the utility vehicle market. The Minejack® carrier is the foundation of today's utility vehicles and has been for over 35 years.

SAFETY AND QUALITY

Marcotte Mining's strength lies in our ability to offer fully engineered equipment, designed to meet CSA Standard requirements and all welding done by Marcotte is controlled to CWB, CSA Standards W47.1. All carriers come with standard fire resistant, self-extinguishing electrical wiring, and oil and fuel lines are strategically placed away from any heat source to avoid potential hazards keeping safety at the forefront of the design.

Our equipment is designed with ergonomically friendly operator compartments for comfort and functionality without compromising visibility while operating the unit. Seat belt safety interlocks are an added standard feature which prevents brakes from releasing when the operator seat belt is not engaged.

FIT EVERY DRIFT SIZE

From narrow vein to wide expanses, we can provide the size and turning radius required for the intended application. Ease of breakdown for slinging and conveyance underground in a shaft is standard for each Marcotte unit. You do not have to use what is available – you can select what you need.

INDUSTRY'S MOST DURABLE

Marcotte carrier frames are specifically designed for the harsh underground hard rock mining environment and are recognized as the most durable.

OPERATING IN THE TOUGHEST CONDITIONS

A complete range of options are available to suit harsh mining conditions. Enclosed cabs with heat and / or air conditioning along with extreme cold weather package are common features on Marcotte units. Operator safety is improved with exhaust blankets and permanent coatings. Marcotte Mining is a Global supplier experienced in all mining conditions.

VERSATILITY

Ensure proper vehicle maintenance with the right specifications customized by you the customer. With the experience and flexibility in manufacturing teamed with customer input, Marcotte's Fuel / Lube Trucks are available in numerous configurations. Single or dual dispensing via Fast fill and OPW makes for quick, easy and efficient transfers of fuel and lubricants to keep your production gear in full service.

OPERATORS' CHOICE

Marcotte carriers are designed with the operators in mind. Our years of experience listening to our customers' needs has allowed us to refine our equipment so the operators and mechanics can easily perform their daily tasks with ease.

WE STAND BEHIND OUR PRODUCT

As the Original Equipment Manufacturer of the Minejack® Carrier, Marcotte Mining Machinery Services Inc. is the leading designer, manufacturer, and marketer of underground utility vehicles. We are confident that our units will perform in demanding environments as our designs are fully supported by the highest quality standards.

Choose Marcotte as your reliable carrier manufacturer.
